REDCLIFF REVIEW

OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

Volume 17. THE REDCLIFF REVIEW. THURSDAY, APRIL 4th, 1929 Number 5

Winning High School Essay For Legion Prize

Was Won by Annet Maitin

Some time ago the local Legion offered prizes for the best essays written by pupils in the high school and grade eight here. At that time the Review announced it would publish the winning essays, but unfortunately we did not get the copy until last week. We are, therefore, publishing the winning essay for the high school pupils, which was written by NaNey Martin. The subject was "The People of Canada. The following is Nancy's composition:

According to the official census of Canada there are no Canadians. Justly proud are the few that can boast of having their parents and grand parents Canadian born. The white race of Canada consists of British, Europeans and Asiatics, with a few to represent the red and black races. Canadians may be divided into two distinct classes: old Canadians including the aboriginal races, the French and British stock; new Canadians including the European and Asiatics immigrants.

The aboriginals or Indians and Eskimos are a minor branch of the old Canadians. Indians reside on reserves and their interests are supervised by the government, but no Indian on a reserve has the right to vote. The race is making a small yearly increase and is yearly becoming more civilized. The Eskimos reside in the northern part of Canada. In 1924 they were brought under the department of Indian Affairs to safeguard and protect them from exploitation.

After the Peace of Paris, resulting from the Seven Years' war when Canada came under British rule, most of the wealthy French returned to France. The rest were forced to remain and rort these we get another branch of the old Canadians, namely, the French Canadians. Bitter racial strife existed between French and British up till the time of the establishmen of responsible government under Lord Elgin followed by the Act of Union. We must remember that our problems of today and tomorrow are bound to be affected by the principle of duel nationality.

The remaining main branch of the old Canadians are the British. There has been a steady flow of British immigrants since Canada came under British rule, until the Great War when there was a natural cessation. United Empie Loyalists came to Canada after the American war of Independence. The Loyalists had a great desire for education and a determination to govern themselves, which helped to make Canada what it is now. How long the British race will be the dominating element in Canada will depend on future immigration policy and the assimilation of the foreign races already here.

A division of the new Cnadians are the Asiatics. By Asiatics we mean Chinese, Japanese and Hindu. The Chinese first came to Canada to help build the Canadian Pacific railway, and later adapted themselves to farming and laundry work. The population of the Chinese in Canada grew until it was necessary to impose a head tax of five hundred dollars on every immigrant. In the last three or four years no native of China was permitted to immigrate to Canada. The Japanese came later than the Chinese, but because of the enormous influx they too had certain restrictions for immigration. The Hindu population was five thousand in Canada in 1923. These were mainly located on the Pacific coast. The problems presented by Asiatics in Canada are two-fold: first, their race tradition and social habits differ from ours and they cannot be assimilated into our population; second, owing to a lower standard of living they accept smaler wages and thus undermine the Canadian workman. Asiatics as a nation are industrious, law abiding, highly intelligent and honorable but at the present time they are overrunning British Columbia, owning over ten million dollars worth of property in that province.

The European people in Canada are classed into three groups: Ukrainians, Scandinavians and Mennonites ad Doukhabors. The Ukrainians came from the south of Russia and eastern Austria. Being oppressed in their native country they came to Canada where they settled as peasant farmers, making excellent citizens and learning our methods with surprising quickness. The Scandinavian consists of Danih, Icelandic Norwegian and Swedish people. These are said to be our best immigrants being both ambitious and prosperous. Mennonites and Doukhabors are a seperate problem owing to religious belief. In addition to these there are in Canada Germans, Austrians, Dutch, Russians and other peoples from Eurasia.

Canada is a land of opppounity, boundless resources and potential wealth. Canadians should welcome foreigners and should try to show them, by their example, the best and highest standards of living. People can make a nation powerful or weak, and only by having the right kind of people in Canada, can she be made a successful and outstanding country. Whether a old Canadian or a new Canadian, let us all strive to make the land of our inheritance the very best possible. What true Canadian does not feel a thril of patriotism when he hears the glorious words of "O Canada" sung?

O Canada! our home and native land,
True patriot love-in all thy sons command.
With glowing hearts we see thee rise
The true north, strong and free;
And stand on guard, O Canada,
We stand on guard for thee.

DR. HENDERSON APPRECIATED

Dr. Andrew Henderson spent last week in town visiting his brother, Mr. Wm. Henderson. While here Dr. Henderson took part in the ceremony in connection with the opening of the new social auditorium. During the week of prayer he took part in the services and last Sunday he conducted the evening service. Despite his more than four score years Dr. Henderson delivered a most animated, enthusiastic and impressive sermon. His messages to the congregation during his stay here created a profound impression on all who heard him. Dr. Henderson stands out prominently as a gentleman of the old school, and because of this character of that type at the present, his faith, his trusting and hopeful outlook and even his very presence are a source of inspiration to all with whom he comes in contact.

Canada lost two pominent Canadians last week in the deaths of Sir Hugh John McDonald and Sir Lomer Gouin, the former a pioneer of Manitoba and the latter of Quebec.

ITEMS FROM BOX SPRINGS

An enjoyable evening was spent at Box Springs U. F. A. hall on Friday, March 22nd at a basket social and dance. All the local young folks were in attendance. Redcliff and Medicine Hat were well represented. The baskets ar numerous and very pretty.

Messrs. Lloyd Williamson and Herbert Smith, as hosts, are to be congratulated on he success of the evening.

Mr. and Mrs. Harding, accompanied by their daughter, arved in Box Springs this week from Winnipeg, to take up esidence on their new farm.

Tera Nova school has opened for the season with Miss Hackney, of Medicine Hat in charge.

Mr. and Mrs. W.G. Middleton have returned to their farm afte spending he winter in Redcliff.

Trucks are beginning to work again. Cyril Hay is busy hauling grain from Bedard Bros. farm.

Mrs. R. E. Page and little son are visiting friends in Medicine Hat.

Mrs. Jas. Whitehead has returned from England where she has spent some months visiting her old home.

Mr. Jim Perkins, of Dunmore, was the guest of Fred Walker, jr., over the week end.

FREE LECTURE ON CHRISTIAN SCIENCE

First Church of Christ, Scientist, Medicine Hat, Alberta, invites you and your friends to a Free Lecture on Christian Science, by Mrs. Nevela E. Ritchie, C. S. B., of Sewickley, Pennsylvania, member of the Board of Lectureship of The Mother Church, the First Church of Christ, Scientist, in Boston, Massachusetts, in the I. O. O. F. Hall, Tuesday, April 9th, 1929, at 8:30 o'clock p. m.

Queen City's Crown

A year ago there was a great hole, nearly a city block in area, facing the Union Station at Toronto. Down in the bottom, half a dozen cranes were busy sorting huge pieces of steel which were being noisily riveted as they were set, meccano like, into position.

On that site today stands the tallest building in the British Empire, the magnificent Royal York Hotel which, in two months more, will open the doors to its thousand rooms and welcome its first guests.

Remarkable as has been the speed with which this great Canadian Pacific Hotel has been erected, still more extraordinary to the man on the street must be the tremendous thought which went into the planning of what will be the most up-to-date institution of its kind in the world and in the working out of those arrangements that will ensure its guests the utmost in facilities and service. There will be, for instance, radio outlets in every room, and in the concert hall, Banquet hall and Ballroom, which have seating capacity for nearly seven thousand people, the most modern means of amplification have been installed to provide not only that speakers and artists and musicians to thoroughly heard wherever they are speaking but, by connection through the radio room, in any other portion of the building. There is provision also for television, should this be developed, for moving picture and movietone projection.

With its own power plant and water-works, its emergency hospital and internal and outside transportation and communication systems, the Royal York Hotel is a complete city. It has its bank and brokers offices, its stores and shops, its community hall and recreation centres. Nothing which a progressive town might have has not been thought of and incorporated to advantage. Down in the basement is a complete printing establishment, a linotype and three presses.

With a tunnel entrance from Union Station, at the junction of all roads into the city, in the heart of "down-town" the site of the Royal York is strategic. With Lake Ontario before it, it is beautiful. The travelling continent will join with the citizens of Toronto in their eager anticipation of the opening day in June.

Popular Dog Star Coming to Cameo

Two More Good Shows Are Billed For Next Week

Rin-Tin-Tin in "Jaws of Steel" will be the next Warner Bros. offering at the Cameo Theatre for next Monday. This is Rinty's thriller and has to do with his being lost in the desert from a pioneer", riever, growing up in the desert to be a wild, wolfish savage and finally saving the riender, Mr. and Mrs. Warren and the Kid, from dangers that threntened them. Don't miss seeing Rinty in the greatest picture of his great career.

Spectacular background, mass movements of whites and Indians, struggles between trappers and red men, with Fred Thomson and his white horse, Silver King, at their best, combine to make "Kit Carson" one of the outstanding pictures of the season. Carson's life was a series of thrills. This picture will be shown next Thursday at the Cameo.

E. H. Sellhorn spent the Easter holidays visiting his motrer at his old home in Minneapolis.

* * *

Mrs. Smith, of Gordon Memorial manse is now able to be around again after her recent illness.

* * *

Wilfred Campeau now has authority to issue Radio Licenses. They are now due. Better get one.

* * *

According o reports several private properties in town changed hands during the past week.

* * *

W. J. Fairbairn, who underwent an operation in Medicine Hat hospital two weeks ago, is expected home again this week end.

Easter Exam. Results For the High School

The following is the report of the Easter test examinations for the Redcliff righ school. The figures in the first column are the numbe of units witten on; the second column, the units obtained and the third column the toal percentage:

Grade XI

Elsie Frey	7	7	58
Evtyn Hicks	8	7	54
Jean Moore	7	5	54
Nancy Martin	7	6	53
Ruby Ferns	6	4	50

Grade X

Irene Buchholz	8	7	67
Eva Beattie	6	6	61
Lucy Blades	7	6	58
Pryllis Sanderson	7	6	57
Jessie Murym	7	5	57
Evelyn Cook	7	5	51

Grade IX

Dan Jensen	7	7	62
Kate Waters	7	6	57
Lorna Ferns	6	4	53
Ernest Fodesta	6	4	52
Teene Kullis	5	2	51
Helen Rose	7	4	50
Lily Moreton	7	5	49
Alfred Lowens	5	1	47
Clara Williamson	5	2	46
Mildred Beattie	4	3	44

The names of the students in each grade are in the order of their tota pecentages.

L. A. Russell, Teacher

Senator Mitchener was registered at the Redcliff hotel last week end on his way to Ottawa. The senator had some private business here.

"Wings," the picture put on at the Cameo theatre Easter Monday, attracted large audiences afernoon and evening and all were delighted with this splendid picture.

* * *

At a meeting of the western Stock Growers held in Calgary this week Senator Dan Riley, of High River was elected president, and Mrs. Ruth Peppard, secretary. Jas. Mitchell of Medicine Hat is a director.

Churches

ST. AMBROSE CHURCH

Rev. J. L. Cooper

Services as usual next Sunday morning and evening.

GORDON MEMORIAL UNITED CHURCH

Sunday, April 7th will be the monthly missionary day in the Church School. A short missionary program will be given and the offering will go to the M. & M. fund of the church.

At 11:15 there will be the month; service for children. Th subject will be "Gardens."

Evening worship will be held at 7:30. Some people are bothered about certain passages of scripture and some people bother other people with questions. We shall bother ourselves by trying to answer the question which has bothered qcite a few people, namely; "Where did Cain ge

We have received donations to his Wife?"

wards buying new hymnbooks. There are now on order. Further contributions will be gladly received.

The Sunday School is also putting in a supply of Psalm books which should add to the interest of the services.

CHURCH OF THE BRETHREN

Rev. Mr. Mulligan, Minister

ST. MARY'S CHURCH UNIFIED FINANCE CAMPAIGN

Celebration of Mass, Second and Fourth Sundays of each month at 8:30 a m

Alderta Cafe Sold This Week

Was Purchased by E. Prusseit Who Will Conduct a Boarding House

During the past week Chong King better known as "Fat," sold his building on Second street, opposite the Review office, to Emil Prusseit, a new arrival in town. Mr. Prusseit also purchased all the furniture and cafe equipment used in the Alderta Cafe which was conducted in thieb building The building is a fine two story brick with full size basement.

It is Mr. Prusseit's intention to have he the inside completely renovated from top to bottom. When this is completed he will conduct an up-to-date boarding house and later on will handle a ine of tobaccos, soft drinks and confectionery. Mr. and Mrs. Prusseit have had a wide experience in this line of business.

WORST STORM OF WINTER STRIKES DISTRICT LAST NIGHT

Just as a gentle reminder that it is still a little early to start putting in gardens, the weather man sent along one of the worst storms we have had all winter. Farmers tell us here is more snow on the prairie now than there has been all winter. Although a little inconvenient for getting around at present, the storm is just what was needed to put the ground in good shape for spring work on the farms. It will also greatly help the stture lands. On the whole the storm, even at this late date, will be very welcome.

HUDSON'S BAY LINE NOW ALMOST CIMPLETET

Steel on the Hudson's Bay railroad has been laid through to Churchill and, according to present plans, a regular railway service will be inaugurated during the late summer. Completion of the Hudson's Bay railway realizes an ambition which has stirred western Canada almost from the time of the arrival of the earliest settlers. The success or failure of his road will be watched closely.

BRITISH FARM BOYS ARE ARRIVING IN ALBERTA

The first batch of British farm boys under the new plan of co-operation betwen the province and the overseas settlement board have arrived and have just been placed in the government agricultural schools at Vermillion and Olds. There were 40 boys in the party and they have been divided equally between the two schools, where they will be given a month's practical training in field work and the care of live stock, then going out to places with farmers.

A second party will follow at the beginning of May, making up, it is expected, a full quota of 100 youths, all personally selected with a view to permanent settlement in Alberta.

Motions to set aside the appointment of P. F. Patterson as interim receiver of the Alberta Petroleum Consolidated, Limited, and to set aside an order giving him authority to proceed with a case against Oakita Oils, Limited, and other companies and certain individuals, will be made by O. E. Culbert, one of the defendants, before the presiding judge in chambers, Monday morning.

Mr. Patterson was appointed interim receiver by an order of Mr. Justice Ford in March 1927 as a result of proceedings brought against the Alberta Petroleum Consolidated.

Several present and former residents of Redcliff are interested in the outcome of this case.

Red Rose Tea comes direct to us from the finest tea gardens, then straight to your grocer — brimful of flavor and freshness. Every package guaranteed.

RED ROSE TEA "is good tea"

RED ROSE ORANGE PEKOE is extra good

In the best package—Clean, bright aluminum

Canada's Financial Position

The financial position of the Dominion of Canada, as revealed by Hon. J. A. Robb, in the budget presented by him to the House of Commons on March 1, is such as to be the source of great satisfaction to all citizens, because, irrespective of party affiliations, every Canadian is intensely interested in the allied subjects of Dominion finances and taxation.

During the war Canada piled up a huge debt for a nation of less than ten million people. The people assumed the heavy burden without grumbling, knowing it to be absolutely necessary, and a price that must be paid to safeguard the liberties of the world, including their own. As war expenditures enormously increased and the debt piled up, it, of course, became necessary to impose much new and heavier taxation, not only to keep the debt as low as possible, but in order to meet heavy annual interest payments upon that debt.

Even after victory was won it was necessary to still further increase the debt in order to bring our armies home from Europe, re-establish the men in civilian life, and make provision for huge sums to be paid annually in pensions. Therefore, for some years the debt continued to increase and heavy taxation to be imposed. At one time it almost seemed that, instead of the debt being decreased, it would go on increasing from year to year.

Recent budgets have, however, been most encouraging, and none more so than that of March 1, last. After meeting all expenditures on both current and capital account, Canada rejoices in a surplus og $70,000,000, the largest ever recorded since Confederation. And this surplus for 1928-29 follows on the heels of a surplus of $67,000,000 in the preceding year. The net result is that as loans mature the Finance Minister is in the happy position of being able to pay them off in cash and not forced to borrow by refunding loans. In other words, the debt is being steadily, even rapidly, reduced. In the fiscal year now closing, Mr. Robb paid off $53,000,000, and he has cash in hand to pay off another $60,000,000 which falls due next August. Thus in two years $113,000,000 is paid off the national debt, and about $6,000,000 a year saved in interest.

Mr. Robb pointed out that seven years ago, on April 1, 1922, the annual interest charge on the public debt amounted to $133,482,113, whereas on April 1, 1929, the annual charge would be $117,142,100, a decrease of $16,340,012.

This very gratifying reduction has been brought about, not by increasing taxation, but, on the contrary, in the face of a steady lessening of that burden. For example, the sales tax, which a few years ago was six per cent., is now only two per cent.; the rate of postage has been reduced from three to two cents; the size of incomes exempt from taxation has been increased, the rates payable on others reduced; the stamp tax on cheque receipts abolished and on cheques largely reduced; numerous reductions in customs tariff schedules have been made, and now taxes on telegrams, cables, insurance policies, railway and steamship tickets are to go.

It is not possible, of course, to remove taxation as rapidly as it was imposed during the war years, but every year sees some advance in the right direction made. And every such reduction has had a beneficial effect on the business of the country with the result that the lower rates have brought in revenues only slightly smaller.

Reduction in taxation has been made possible through three main causes. First, the care exercised by Mr. Robb over all expenditures which he has insisted be kept down to the lowest possible point consistent with efficiency and the expanding needs of the country. Economy has not been enforced to the point where development of the country was checked, but expenditures on non-productive services have been kept to a minimum. Second, whereas in 1920, 1921 and 1922, the Canadian National Railways were operated at a deficit amounting in the three years to more than $148,000,000, in the year just closed, the C.N.R. not only paid all operating expenses, all interest on bonds and debentures held by the public, but accumulated a cash surplus of $6,000,000. Third, the substantial increase in the trade and commerce of Canada, assisted by reductions in taxation, and the marked development in all branches of industry, has brought larger revenues to the Government.

And the bright, the promising feature of the situation is that all indications point to a continuance of these same favorable conditions throughout the next fiscal year so that the people of Canada can look forward with a large degree of confidence to next year's Budget disclosing another large reduction in the national debt and still further decreases in taxation.

For Influenza

The Liniment That Relieves All Ailments

MINARD'S "KING OF PAIN" LINIMENT

Highest Timber Line

The highest known timber line is on Mt. Orizaba, in Mexico—14,000 feet above sea level. On the Alps, the Himalayas and Rocky Mountains the trees advance somewhat over 10,000 feet toward the mountain tops. The trees at this height appear to be little more than mangled, wind-blown bushes.

10,000 Bottles a Day

Every day 10,000 women buy a bottle of Lydia E. Pinkham's Vegetable Compound. They know that there is no better remedy for their troublesome ailments with their accompanying nervousness, backache, headache, "blue" spells, and rundown condition.

Lydia E. Pinkham's Vegetable Compound

New Land Under Cultivation

Extensive Areas In Western Canada Are Annually Taken Up

Additional extensive areas are annually brought under farm cultivation in Western Canada. Last year it was estimated a total close to 2,500,000 acres of Canadian Government free homestead lands were taken up by settlers in the four Western Provinces; a total of 15,566 homesteads being filed upon, each of 160 acres, compared with 9,357 in 1927.

There is now one motor vehicle for every 21 of the population of Great Britain.

Mother Graves' Worm Exterminator will drive worms from the system without injury to the child, because its action, while fully effective, is mild.

Without Comment

A California authoress sent a manuscript to Ambrose Bierce, with the request that he gives her "a criticism in one sentence, and drop further comment." Something was heard to drop all up and down the Pacific coast when he replied: "The covers of your book are too far apart."

Not only does the girl in some districts of Indo-China make the proposal, but with her also lies the initiative for divorce.

Use Minard's Liniment for the Flu.

Not Waste Of Time

Investigating Breathing Of Bees Discloses Interesting Facts About Health

To spend time investigating the question of the bee's breath may seem superfluous, but scientists have determined that besides giving a clue as to the health of the hive in the winter time and in the summer, the breathing is an index to other interesting facts about the colony. Professor G. H. Vansell, of the University of California, rigged an apparatus by which he could measure the carbon dioxide and the water vapor given off by a colony of bees in both winter and summer.

Sore Corns Drop Off If You USE "Putnam's"

When you notice any sign of callous on the feet or toes—that's the time to paint on a few drops of PUTNAM'S CORN EXTRACTOR. Do this, and you prevent corns. No matter if the corn is hard or soft. Let it be on top or between the toes, Putnam's will remove it without pain. Insist on PUTNAM'S CORN EXTRACTOR. It does the work—and roots out the corn, quickly and without pain.

Predicts Library Of Aerial Photographs

May Be Created Within Ten Years Says J. W. Pierce

The creation of a library of one million aerial photographs within the next 10 years to constitute a reference inventory of Canada's natural resources was predicted by President J. W. Pierce, D.L.S., at the annual convention of Dominion Land Surveyors at Ottawa when he said that already 250,000 aerial photographs covering areas from coast to coast had been assembled and placed in use for this purpose under the Topographical Survey of Canada, Department of the Interior.

BABY'S OWN TABLETS WIN GREAT PRAISE

Many Mothers Always Keep Them In the House

Thousands of mothers state that they know of no other medicine for little ones to equal Baby's Own Tablets—that they always keep the Tablets in the home as a preventive of childhood ailments, or if sickness does suddenly grip their little ones they feel safe with such a remedy at hand.

Concerning the use of the Tablets Mrs. Donat Pinodre, Tingwick, Que., writes:—"I have nothing but praise for Baby's Own Tablets. They are the only medicine I have ever given my two little ones and I am glad to state that the Tablets have always kept them in perfect health. I feel so safe with the Tablets that I always keep a box in the house."

Baby's Own Tablets are a mild but thorough laxative. They regulate the bowels, sweeten the stomach and banish constipation and indigestion; break up colds and simple fever and make the cutting of teeth painless. The Tablets are absolutely safe, being guaranteed free from all injurious drugs. They are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Our Natural Resources

Wonderful National Heritage Of Untold Wealth Awaiting Development

The natural resources of Alberta are an immense treasure trove. Great industries will some day grow up in the Canadian west. Coal, oil, minerals, lumber, water power, as well as rich agricultural land await the coming of capital and organizing ability to open the Aladdin's cave of untapped natural resources. In the years ahead, before the end of this present century, agriculture may itself have been transformed into something like a manufacturing industry operated largely by industrial chemistry. In the meanwhile, there is any amount of work ahead of the provinces to make the most productive use of the resources which the Dominion government are handing over as part of the west's share of a wonderful national heritage.—Ottawa Citizen.

George Washington's second inaugural address contained 134 words, and is regarded as the shortest in the history of such occasions in the United States.

PILES are quickly Soothed & Healed by Zam-Buk

Western Canada Air Mail

Vote In Parliament Foreshadows Important Development

The main estimates tabled in parliament almost certainly foreshadow the establishment this year of an air mail service in western Canada. Bearing in mind the probable cost of the Winnipeg-Calgary air mail service, the increase in the appropriations to be sought by the post office department and the national defence department can be interpreted in no other way than as foreshadowing this most important development.

The vote on the air mail service in the estimates of the post office department is increased from $400,000 to $1,200,000 and this is more than sufficient to cover all contracts needed in the western services, likewise the increase in the vote for the establishment of air routes, in the defence department, of $313,432, is about twice the amount required to construct light beacons and emergency landing fields along the 1,200 mile route from Winnipeg to Calgary and north from Regina to Saskatoon, and from Calgary to Edmonton.

In other respects the main estimates are of great interest to the west. The items for the department of agriculture show very substantial increases. There is an additional vote of $437,000 for cold storage warehouses, $250,000 for seed grain control and grants to seed farms, $150,000 for experimental farms, $180,000 for health or animals, $10,000 to establish a co-operative branch in the department, and $25,000 for Canada's share in the newly organized empire bureau of research.

Where Living Is Cheap

Fiji Islanders Work Little and Pay No Rent For House Or Land

Fiji falanders have a pretty easy time, little work and no rent to pay.

The placid life of the Islanders brightens the heavy reading of the annual colonial report for 1927, which has just been issued by the Fiji government.

"Labor conditions do not exercise any considerable influence on the Fijians as a whole," declares the report, "apart from affording additional social amenities. Every Fijian is a member of a land-owning unit, and has the right to use a portion of the tribal lands for planting crops for food and profit, or for raising cattle. "If he remains in his village, he is provided with a house of native construction, built by the community of which he is a member. Beyond performing his share of the work done for its benefit by the community as a whole, he pays no rent either for his land or his house."

Going Upstairs Had to Sit Down Breath So Short

Mrs. H. Brousseau, Magog, Que., writes:—"For many years I suffered with shortness of breath; then four years ago I had palpitation of the heart, and was so bad I had to sit down two or three times when going upstairs. I read about

MILBURN'S HEART AND NERVE PILLS

so I got a box, and in no time I felt better, so I took three boxes more and I have never had shortness of breath since."

Price 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

His Worry

"I hear you are going to California with your husband, Jane," said Mrs. Jones to her maid, who was leaving to get married. "Aren't you nervous about the long voyage?"

"Well, mum," was Jane's reply, "that's his lookout. I belong to him now, and if anything happens to me it'll be his loss, not mine."

Village Fire Marshal—I was just readin' in this history about the lurkin' of House.

Head Pipeman—What started it, chief; crossed wires or a lighted cigarette?

Has Met With Success

Marshall Stillman Movement In States Helps Discharged Convicts To Reform

Possibly few persons could say offhand what the Marshall Stillman Movement is, and yet it is grappling with, and greatly aiding in the solution of, one of the most pressing social problems in the United States, that of taking care of the convict on his discharge. It strives to catch the former convict just as he leaves prison in a mood of uprightness and to give that mood an opportunity to express itself. Its "clubs" have figured as perhaps the most important feature of its work until recently, but during the last year the question of jobs for its wards has been answered more successfully than ever before by the establishment of enterprises where former convicts alone are employed. The plan has succeeded beyond expectation, and to date, has to its credit a 100 per cent. record of achievement; that is, there have been no backsliders.

Society has in the past been responsible for many first-time offenders becoming habitual criminals. This movement is an effort to enable men who earnestly desire to do so, really to straighten out. — Chicago Science Monitor.

Buffalo Shipped To Italy

Three buffaloes from the government park at Wainwright, have been sent to Italy, where they will be placed in one of the state parks. Prior to their long journey overseas they were segregated for three weeks, during which time they underwent a tuning process. The animals were shipped to the Royal Italian Government.

The Great War has been estimated to have cost $55,000,000,000.

YOU CAN'T DYE with Good Intentions

You can get results—after a fashion—with any old dye; but to do your work you are proud of takes skill and knowledge. That's why we put them in Diamond Dyes. They contain from three to five times more than other dyes on the market! Cost more to make? Surely. But you get them for the same price as other dyes.

Next time you want to dye, try them. See how easy it is to use them. Then compare the results. Note the absence of that re-dyed look; of streaking or spotting. See that they take none of the life out of the cloth. Observe how the colors keep their brilliance through wear and washing. Your dealer will refund your money if you don't agree Diamond Dyes are better dyes.

The white package of Diamond Dyes is the original "all-purpose" dye for any and every kind of material. It will dye or tint silk, wool, cotton, linen, rayon or any mixture of materials. The *blue package* is a special dye, for silk or wool only. With it you can dye your valuable articles of silk or wool with results equal to the finest professional work. Remember this when you buy. The *blue package* dyes silk or wool only. The *white package* will dye every kind of goods, including silk and wool. Your dealer has both packages.

Diamond Dyes *Easy to use* *Perfect results* 15c AT ALL DRUG STORES

YOU'LL FIND A hundred vital, saving uses for Para-Sani Heavy Waxed Paper in your home. Comes in handy, sanitary, knife-edged package. For less exacting use: "Centre Pull" Waxed Tissue (flat sheets). At grocers, druggists, stationers.

Aerial Search For Gold

Flights Of Planes Are To Explore Northwest Territories

Two or more new Fairchild cabin monoplanes are due to arrive in Edmonton within the next month or so.

These are but two units of a flotilla of aeroplanes of Dominion Explorers Limited a recently-formed syndicate which plans to prosecute an intensive aerial search for gold throughout the northwest territories, with a flying base at Tavanes, well within the Arctic circle on Hudson Bay, and a territory of 60,000 square miles, reaching from the Bay to Alaska, with the Arctic ocean as its northern boundary.

Sheer across the territories the search will run. It will dip south and west from the Mackenzie river up the Liard river into the famed and mysterious Nahanni country. It will seek out the hidden gold in the solitary Barren Lands, and will pry valuable rock from beneath the snow that fringes the grim Arctic itself.

High test gasoline for the aeroplanes has already been ordered from the Imperial Company in Edmonton, to be dumped at strategic points along the rivers of the north.

One such base will be at Frobisher Lake, 200 miles northeast of Waterways, and it is reported that the company has secured two of the prospectors who went into the Nahanni country last summer, piloted by Captain H. A. Oakes, of the N.A.M.E. Company.

At Tavanes, on Hudson Bay, 1,000 miles north of Winnipeg, and far beyond Fort Churchill, the explorers, headed by Captain Charles Sutton, with a party of some 15 aviators and geologists, are already housed in seven double-walled shacks.

Three Fairchild monoplanes, a tractor, an auto, 10,000 tons of coal, gasoline and food caches, blankets, clothing and lumber have been taken in, and considerable work was done last year.

The explorers are a subsidiary of the Thayer-Lindsley Company, a Canadian syndicate with vast resources of capital and experience.

From the air promising locations will be mapped, and surveyors and miners will be rushed in to open up claims.

Banner Year For Sheep Owners

Prices Have Been Most Remunerative During the Past Season

"In the main Canadian sheep owners have experienced another banner year," state officials of the Canadian Co-Operative Wool Growers, in a summary of the 1928 situation. "Prices for both wool and lamb have been most remunerative, the wool clip averaging from 5 to 25 per cent. above values for the previous season, and lamb prices fully equal to the high level a year ago. The sheep population of the country has shown a steady increase with excellent gains in the four western provinces and Ontario.

Still Indebted To Britain

Only two modern peoples have ever repudiated their state debts, Soviet Russia and eight of the United States. The debts repudiated by the latter, following the Civil War, were contracted to build bridges, roads and schools. The principal and interest still owed, mostly to British bondholders, would wipe out several yearly instalments of Britain's debt to the United States. Some great United States newspapers hope that their country's national conscience may recognize a duty in this direction.

The soya bean originated in Manchuria, where it has a history of some 5000 years. It was introduced into America about the end of the eighteenth century.

"Mummy, where do missionaries and cannibals go when they die?"

"Missionaries go to Heaven and cannibals go to Hell."

"But suppose the missionary is inside the cannibal?"—Il Travaso, Rome.

Hotbed For Early Plants

Specific Instructions For Making and Starting the Hotbed

If one wishes to have tomato plants and annual flowers well advanced for setting out when the warm weather arrives, the hotbed should be started in a hotbed. A simple frame for such a bed is made out of two-inch planks. It should be so constructed that it may be raised as this may be necessary if the plants as they grow get too close to the glass. The frames should be at least six inches higher at the back than at the front in order that the rain will run off readily. It should face the south so as to get the maximum of sunshine. It should be made to suit the size of sash one has available. For home garden use, a double window answers very well and the frame should be made so that the sash sits squarely upon it. A hotbed may be made either above or below ground. If above ground and located on the south side of a building, or close board fence so as to be protected from cold north winds. A pit of 18 inches deep where the water will not lie, makes a suitable foundation. If the pit has not already been dug the bed may be set on top of the soil. As heating material, horse manure is the best to use. It should be piled in a fresh state near where the hotbed is to be and when it begins to heat it should be turned to make it of more uniform consistency. If the manure is very strawy it will not heat quickly, and may get too hot later on. Five or six days after turning it should be quite hot and is now ready for use.

The bed is started from one end, and the manure shaken in from a fork so that the long and short manure will be well mixed. It is important to tramp in each layer until the required depth is reached. From one foot to one foot and a half is depth enough after the middle of March. After the manure has been put in the frame should be placed on, and then about four to six inches more manure put in and banked well around the sides of the frame both inside and out. Outside the manure should be banked to the top of the frame, and from twelve to fifteen inches in width. The bed is now ready for the sash. Shelters made of one-inch lumber, the same size as the sash, are used for covering them as they help to conserve the heat in cold weather. In two or three days the sash should be removed, the manure given a stirring all over making it level and then soil should be put on.

The soil should be rich and of light loamy character and should be put on from five to six inches in depth and levelled evenly. In five or six days the hotbed will be ready for the seed, but it is necessary to wait until the temperature has fallen between 60 and 90 degrees. If the heat rises above this the sash may be raised a little each day. A thermometer thrust in the soil is necessary to determine the temperature. When the bed has reached the right temperature the soil should be packed over a couple of times, the surface levelled and made fine with the rake. The seed may now be sown in rows about four inches apart and the same depth as one would sow the seed in the open garden. Ventilation at this stage and afterwards must be carefully watched to avoid too high or too low temperature. In the soil it should not get below 50 nor above 85 degrees. Buch watering should be given as will keep the soil in nice moist and not wet condition. Instructions for pricking out and handling the plants are contained in Circular No. 54, entitled "Hotbeds and Cold Frames," available at the Publications Branch of the Department of Agriculture, Ottawa.

Japanese Millionaires

There are 3,000 millionaires in Japan, according to figures prepared by a reliable financial authority at Tokio. Out of the fifty wealthiest men in Japan, 39 are living in Tokio. When one speaks of a millionaire in Japan, one refers to the possessor of a million yen, which corresponds to approximately $500,000.

Not To Be Expected

"Edward you disobeyed your grandmother when she told you just now not to jump down those stairs." "Grandma didn't tell us not to, dad. She only came to the door and said, 'I wouldn't jump down those stairs, boys,' and I shouldn't think she would!"

Germany has a new 10,000-ton cruiser, said to be the most powerful afloat. But under the Treaty of Versailles, Germany can only have eight of them.

You can say this in defence of the modern girl—she dearly loves the spinning wheels.

Controlling Noxious Weeds

Farmers Should Take Extra Pains To Secure Clean Seed

Any farmer would be highly incensed if he found that in the mill feeds or concentrates purchased there was some extraneous matter that would prove poisonous or injurious to his live stock. Farmers, on the other hand, will purchase and commit it to the soil without regard to the contents and, with complacent indifference to the character or number, of weed seeds thus distributed. Seeding a farm down to any one of the primary noxious weeds is a more serious matter than the loss of one or two head of live stock.

The Seed Branch at Ottawa has laboratories strategically located throughout Canada where samples of seed, up to three in number, are analyzed free of charge. A full report is made on the condition of the seed and on its weed seed content. Canada thistle, rag weed and a score of other unwelcome weeds, like the poor, we have with us always. But it is a serious matter to bring in bladder campion, sow thistle, twitch grass, catchfly, mustard and others of the kind that have driven men from their farms.

It is better to be safe than sorry. The easiest way to control weeds is to keep them out of the land. Why poison the farm?

Building Outline In West

1928 Building Program Was Largest in Many Years

According to data tabulated by the Dominion Bureau of Statistics, the value of building authorized by 63 cities during 1928, was considerably greater than in any other year since this record was commenced in 1920, aggregating $219,105,815, as compared with $184,613,472 in 1927.

In Saskatchewan, building authorizations were at their peak since the boom of 1912, rising from $7,928,874 in 1927, to $13,449,226 in the year under review, or by 69.6 per cent. Alberta showed a gain of 90.6 per cent. over 1927, with a total of $10,292,579.

The British Columbia aggregate of $24,465,163 was 14.8 per cent. larger than in 1927.

Girl: "I want to get a new song—'Pumyface.'"

Assistant (in music shop): "You're not so good-looking yourself."

Immense Trade Possibilities

Unlimited Market For Canadian Wheat and Flour In the Orient

"The trade is there. It is up to us to go after it." This is how R. D. Williams, of Vancouver, who recently returned from a tour of the Orient described the possibilities which exist in the far east for Canadian trade. The speaker, in address before the Vancouver Board of Trade, pointed out that there are approximately 440,000,000 people in China, 70,000,000 in Japan, and 300,000,000 in India providing a market of 860,000,000 people. Stating that Canada had only three trade commissioners endeavoring to promote Dominion trade with the far east the speaker said that Canada should have more representatives there to protect her interests.

Canadian flour, the speaker said, had developed a large trade in China but it was sold by either American or Japanese firms. In many cases it was sold as "American flour" Mr. Williams stated. The Chinese feel that anything that comes from the coast is American and Canada was doing nothing to offset this impression among the Chinese, the speaker claimed. K. W. Johnson, salt commissioner in Shanghai, was another speaker at the Vancouver meet and pointed out that instead of rice the Chinese were now turning to flour and if each of the 400,000,000 people in China could be reached with one bag of flour a year, Canada and the United States would be unable to meet the demand.

Only Recipe For Happiness

Problem Is Solved When You Make Others Happy

People are always chasing after happiness, and it is always eluding them. They hunt for it in all sorts of queer corners—fame, riches, sport, love, friendship, and what not—but they come no nearer to it than grasping its tail. If they would only stop thinking of being happy themselves, and start planning how happy they can make someone else, they would soon find the problem solving itself. The way to get happiness is to give it.

The German government has invited teachers from Argentina to inspect the schools of Germany.

England Pays More For Australian Wool

Cleaner Than Canadian Product and Loses Less In Shrinkage

Many wool growers in Canada cannot understand why the Australian wool commands a better price in England than Canadian wool, and do not realize that there is a great difference in shrinkage between the two products," stated W. H. J. Tisdale, Assistant Manager of the Canadian Co-operative Wool Growers, to the School of Marketing, United Farmers' Building, Toronto. Mr. Tisdale had been telling the "class" of the great strides made by Canadian wool growers in producing better qualities, and had mentioned the fact that the Canadian product could compete on an equal basis with the Australian wool; the only difference being a matter of shrinkage. "But when wool from Australia loses only 35 per cent. in shrinkage," he said, "and the Canadian wool loses some 60 per cent.—that is for wool greasy weight—you naturally expect that the Australian product will bring a higher price. This is due to climatic conditions and to the fact that the Australians have raised the weight of clips through better breeding."

"Canadian wool has not yet reached a stage where it could be considered clean," he continued. "Many of the growers still persist in sending in wool that contains burs, alfalfa, straw and seed. This, of course, lowers the grade of their wool, as it costs more to have to clean the shipment, and sometimes it is almost impossible to remove these foreign elements. The grower could overcome this, as many have, by following feeding methods that assure a clean fleece.

Worked For Low Wages

England's eldest man, William Walker, of Nottingham, is dead at the age of 107 years. Walker went to work at 12 years of age as a bricklayer, but though he worked until he was 86 years old he never earned more than about $5.25 a week. When he was that age he went on strike for an increase of one cent an hour, and failed to get it, so he never worked again.

"How much are these packets of pins?"

"One penny, madame."

"But I thought there was a sale on?"

Canada's Tourist Traffic Increases

Number Of Cars Entering Canada From U.S. Increasing Rapidly Each Year

The official figures on the number of tourists' automobiles which entered Canada in 1928, have been awaited with considerable interest. In the release by the Department of National Revenue, of figures for the number of foreign automobiles entered at customs' ports, is found full confirmation of the increase in tourist traffic forecasted by the earlier statements of various provincial authorities. There was an increase of nearly 500,000 in the number of cars which entered Canada last year, compared with 1927, the 1928 total of 3,645,455 motor cars comparing with 3,153,800 in the earlier year.

The mere statement that 1928 was a record breaking year for tourist travel in Canada does not do full justice to the figures, comments the Department of the Interior, through its Natural Resources Intelligence Service. The service, which has been closely in touch with the tourist traffic through a great volume of personal correspondence and the issue of hundreds of thousands of maps and tons of tourist literature, is naturally keenly interested in the official figures on motor car entries.

Actually the number of automobiles which entered Canada last year was but more than fifteen times as great as ten years ago, the number in 1919 being 237,863. The rapid development of the tourist traffic in the last three years is shown by a gain of over 1,500,000 in the number of cars visiting Canada annually.

The Natural Resources Service is not so much interested however in the total of the tourist traffic as in the character of the traffic. The total figures naturally include a great many automobiles which crossed at border points in the thickly populated areas of the East for a stay in Canada of 24 hours or period of less. In this particular there was a gain of more than 288,000 cars last year, as compared with 1927.

What is of much greater interest is that the official statistics show a gain of 203,000 in the number of automobiles carrying parties into Canada for a stay of from 24 hours to six months. This is the greatest increase on record and whereas in two years of the last ten the total number of foreign motor cars entering Canada showed a decrease, it is significant that in the number of visiting cars remaining in Canada for a vacation period the total has been constantly up, the annual increases ranging from 15 to 57 per cent.

Origin Of Fountain Pen

Primitive Instrument Found By Excavators In Egyptian Tomb

The modern fountain pen is said to have originated in the land of the Pharaoh, 4,000 years ago. Excavators in an Egyptian tomb uncovered a primitive instrument consisting of a section of reed of the diameter of a lead pencil, about three inches in length and mounted on a long piece of copper.

The nib of the pen was cut away to a fine point like an ordinary quill pen. The narrow tube of the reed served to hold in reserve a small quantity of the writing fluid, whatever it may have been.

Too Good To Let Slip

Mother: "Johnny, how dare you strike your little sister?"

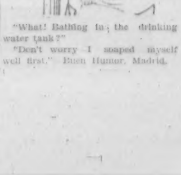
Johnny: "Auntie made me."

Auntie: "Nonsense, Johnny; I said if you did I would never kiss you again."

Johnny: "Well, I couldn't let a chance like that slip."

Mrs. Pester—Oh, dear! I paid $3 for this steak and it's so tough we can't eat it. And I pounded it for half an hour, too.

Her Husband—Pounded the steak! Why didn't you pound the butcher?



"What! Bathing in the drinking water tank?"

"Don't worry—I stopped myself well first."—Buen Humor, Madrid.

To Honor Jeanne D'Arc in Old Orleans

(236)

Orleans, that historic town in north central France, will be the mecca this year of thousands of Canadians and Americans of French descent, for 1929 commemorates the 500th anniversary of the deliverance of the city of Orleans by the martyred Jeanne D'Arc, probably the greatest heroine in history, who was burned at the stake by the English because they believed she practiced witchcraft. So great was her influence with the army of France that riding at the head of some 4,500 men she succeeded in entering Orleans on the 29th of April, 1429. So inspired were the Frenchmen under her that after stubborn resistance the English finally became discouraged and evacuated the city. It is admitted that the extraordinary pluck and sense of leadership of the "Maid of Orleans" was responsible for the French victory.

To commemorate Jeanne's heroic exploit, a series of civil, military and religious fetes will be held on the 7th and 8th of May, including additional events, such as a tournament of jousting, after the fashion of knights of old; in which mounted warriors in all their plumes and armor will rush at one another will tilted lance to gain the favor of the "ladies fayre" witnessing the contests. Pageants representing French history of the past five centuries will have a place on the 15-day programme, and arrangements are already being made to accommodate the heavy influx of expected tourists.

Anticipating the desire of many French-Canadians and Americans of French origin to visit the ancient city of Orleans during the festival period, several steamship companies have arranged their sailings so as to include arrivals in France in time for the pageant. The Canadian Pacific Steamships, for instance, have assigned the "Empress of Australia" to sail from New York, April 17; the "Metagama," from Saint John, N.B., the same day, and the "Montcalm" from the same port, April 24. t

WORLD HAPPENINGS BRIEFLY TOLD

The French Parliament has ratified France's signature to the Kellogg renunciation of war pact by a vote of 570 to 12.

There were 2,300,000 unemployed in Germany on February 15, an increase of 50,000 since the end of January, official figures show.

The year 1928 was a disastrous one for Canadian hail insurance companies, the loss ratio being 100.39 per cent. of the premiums, according to official figures released at Ottawa.

Announcement is made by the Canadian Bank of Commerce that arrangements have been made to open a branch at Fort Churchill, Man., the eventual terminus of the Hudson Bay Railway.

France notified the League of Nations that she is in favor of a British proposal for an opium inquiry in the far east by a committee of experts. She will contribute $5,000 to the expense of this inquiry.

The question of the provision of a submarine telephone cable between England and the United States, Canada, and Newfoundland, is likely to be a matter of early consideration by the British postal authorities

Edmond J. Massicotte, well known Canadian artist, died at his home at Sault Aux Recollets, Que., after a short illness. He was 53 years of age. Massicotte was known chiefly through his pen and ink sketches of Canadian subjects.

A total of $9,814,531.65 was spent in 1928, in grading, track laying, and ballasting on the Canadian National Railway lines according to a report tabled in the House of Commons by Hon Charles Dunning, minister of railways.

Newly Married Man (inebriated and apprehensive)—" I wonder what my wife will say when I get home?"

His Friend—"When you've been married as long as I have, ol' man, you'll know beforehand.'

Are *You* Ready

When *your* Children Cry for It

Baby has little upsets at times. All your care cannot prevent them. But you can be prepared. Then you can do what any experienced nurse would do—what most physicians would tell you to do—give a few drops of plain Castoria. No sooner done than Baby is soothed; relief is just a matter of moments. Yet you have eased your child without use of a single doubtful drug; Castoria is vegetable. So it's safe to use as often as an infant has any little pain you cannot pat away. And it's always ready for the crueler pangs of colic, or constipation, or diarrhea; effective, too, for older children. Twenty-five million bottles were bought last year.

Fletcher's CASTORIA

Examination Of Mine Prospectuses Likely

British Columbia Will Legislate To Protect Investors

Legislation designed to protect investors in British Columbia mines is being introduced in the Provincial Legislature by the Government. It will force all new mining companies to file copies of their prospectuses with the mines department as soon as they are issued so that the department may act immediately against any misleading statements about mineral properties.

The new law is designed to speed up the issuance of official statements and so prevent "wild cat" promotions from obtaining the public's money before they can be quashed.

Winnipeg Newspaper Union

Fashions

It's Simple—Smart

Nothing more lovely, or any smarter, than this attractive one-piece dress of patterned wool jersey for busy daytime wear. It is cut in such a clever manner that it gives the idea of a hip yoke. The plaited section in skirt and jabot frill, which is of plain jersey, are only extra parts to pattern, with a stitched applied band above plaits. Belt of plain jersey nips normal waistline. Style No. 353 is designed in sizes 16, 18 and 20 years, 36, 38, 40 and 42 inches bust, and is made with 2¾ yards of 40-inch material with ⅝ yard of 36-inch contrasting for the 36-inch size. Sheer tweed, homespun, wool crepe, printed sheer velvet, plain velvet, crepe satin and canton crepe are becoming fabrics suitable for its development. Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

We suggest that when you send for this pattern, you enclose 10 cents additional for a copy of our Fashion Magazine, showing all the most attractive Paris styles, embroidery, etc.

World's Poultry Congress

Canada To Be Well Represented At Big Event In London In 1930

Canadian poultry breeders will exhibit in the neighborhood of 1,000 birds at the World's poultry Congress to be held at the Crystal Palace, London, in July, 1930, according to F. C. Elford, Dominion Poultry Husbandman and president of the World's Poultry Science Association. Canada will also enter an educational exhibit. Hon. Dr. W. R. Motherwell, Minister of Agriculture, has named an executive committee, composed of the various Provincial Ministers of Agriculture, with H. B. Donovan, internationally-known poultryman, as chairman. There will also be various sub-committees with their respective chairmen.

ABOUT YOUR NERVES

Headaches and Other Troubles Follow When the Nerves Give Way

Nerves are delicate fibres running from the brain to all parts of the body. Some of them give us the sense of touch and feeling; others convey the will to our muscles and enable us to move. When we have an "attack of nerves" it means that the body is in some way out of order and the nerves have become oversensitive so that we get neuralgia, nervous headache, sciatica, or some other nerve trouble. Sometimes the nerves get too weak to do the will of the brain, and we get trembling hands or limbs, or perhaps St. Vitus dance. The whole nervous system is fed and kept healthy by your blood. If that is thin and poor nervous weakness follows. In that case a tonic is needed to build up the blood, so that it may in turn feed the nerves, spine and brain. The very best medicine for enriching the blood is Dr. Williams' Pink Pills. You cannot take them without feeling the uplift they give. Your appetite improves, your brain is clearer, you feel full of new life. One sufferer, Miss Margaret R. MacDonald, Catalone Road, N.S., tells what this medicine did for her. She says:—"I suffered for a long time from severe headache and nervous exhaustion. I tried several kinds of medicine but got no relief until I used Dr. Williams' Pink Pills, and these, before long, gave me complete relief. From my own experience I feel that I cannot praise Dr. Williams' Pink Pills too highly, and would advise anyone who is suffering from headaches or nervous exhaustion, to give them a fair trial, as I feel sure the results cannot be anything but satisfactory."

Take these pills as a tonic if you are not in the best physical condition and cultivate a resistance that will keep you well and strong. You can get these pills through any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Asthma No Longer Dreaded. The dread of renewed attacks from asthma has no hold upon those who have learned to rely upon Dr. J. D. Kellogg's Asthma Remedy. So safe do they feel that complete reliance is placed on this true specific with the certainty that it will always do all that its makers claim. If you have not yet learned how safe you are with this preparation at hand get it today and know for yourself.

One of the world's largest dams has been constructed on the Indus river, in India, for irrigation purposes.

Internal parasites in the shape of worms in the stomach and bowels of children sap their vitality and retard physical development. They keep the child in a constant state of unrest and, if not attended to, endanger life. The child can be spared much suffering and the mother much anxiety by using a reliable worm remedy, such as Miller's Worm Powders, which are sure death to worms.

The Japanese alphabet possesses two sets of characters—katanaka for the use of men, hiranaga for women.

The Oil Of the People.—Many oils have come and gone, but Dr. Thomas' Eclectric Oil continues to maintain its position and increase its sphere of usefulness each year. Its sterling qualities have brought it to the front and kept it there, and it can truly be called the oil of the people. Thousands have benefitted by it and would use no other preparation.

At Broussa a Turkish captain has been sentenced to a year's hard labor for opposing the new alphabet introduced by Mustapha Kemal.

Sores Flee From It.—There are many who have been afflicted with sores and have driven them away with Dr. Thomas' Eclectric Oil. All similarly troubled should lose no time in applying this splendid remedy, as there is nothing like it to be had. It is cheap, but its power is in no way expressed by its low price.

The first patent for the manufacture of wallpaper was taken out in 1692.

Channel Tunnel Work Started Years Ago

Belief That Part Of Undertaking May Be In Fair Condition

High interest is being shown all over Great Britain at the possibility of a channel tunnel between Dover and Calais.

It is recalled by residents of Dover (Kent), that it is 44 years ago that work was begun both in France and England on a tunnel, and many are of the opinion that parts of it may still be in tolerably good condition.

One of the workmen who helped dig the tunnel in 1885 showed a correspondent the entrance at the foot of the Shakespeare Cliff, Dover, about two miles outside the town of Dover.

Descending some hundreds of feet by a series of uneven steps but in the chalky face of the cliff you arrive at a light railroad belonging to a disused coal mine near by where can be plainly seen a slight depression in the soft soil beneath the railway sleepers. That is the tunnel and underneath are the foundations of the old engine house where the air was pumped into the excavators.

The tunnel shaft was filled in when the coal mine was opened, but the actual tunnel was left untouched. It was only a "pilot" tunnel to explore the strata and by the time about a mile and a half had been completed it was decided to carry on with the scheme.

The work was continued for about another mile when suddenly the work was stopped both on the English side as well as the French.

The original plan was that the entrance should be at Shakespeare Cliff, Dover, so that the trains coming from London could enter the tunnel after coming along the coast from Folkestone.

At the Dover end, the shaft is about 150 feet deep and descends very gradually. It was lined with cast iron segments, similar to the London subways, and may possibly still be quite dry.

The talking movie has ruined another good place to sleep.

Noted Explorer Dies

Surgeon Captain Edward Atkinson, commander of the Antarctic expedition that found Captain Scott and his companions and brought back the records in 1912, is dead at the age of 46 years. He served with the Grand Fleet in the war at Gallipoli and with the Howitzer Division in France, earning the D.S.O. and mention in despatches.

New Form Of Identification

Teeth prints have been added to finger prints and foot prints as means of identifying criminals. When inquiring into a burglary at a priest's house at Odense, Denmark, the police found teeth marks in a sweet in the form of a marzipan pig. A suspect's teeth were examined and found to tally with the marks on the candy.

ACHES

WHEN a cold or exposure brings aches and pains that penetrate to your very bones, there is always quick relief in Aspirin. It will make short work of headaches or any little pain. Just as effective in the more serious suffering from neuralgia, neuritis, rheumatism or lumbago. No ache or pain is ever too deep-seated for Aspirin tablets to relieve, and they don't affect the heart.

WINDOLITE

The Improved Glass Substitute

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionised gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold —will not crack or chip.—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 135 to 150 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price $1.50 Per Square Yard, f.o.b., Toronto.

When Pain Comes

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sours. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention.

One spoonful of this harmless, tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Good Scheme For Canada

World Profit Under Family Allowance System, Says Economic Expert

Ottawa.—If Canada had inaugurated the family allowance scheme in 1900, her population would be greater today by 2,000,000 persons and her federal revenues would have increased by $15,000,000 and $25,000,000 declared Father L. Lebel, of the college of Immaculate Conception, Montreal, expert in economics called before the special standing committee of the House of Commons on industrial and international relations.

He stated that society should pay for the poor man's gift to the nation—children.

European countries had adopted the family allowance scheme and had found it profitable and sound in principle. It would serve a satisfactory attitude between workers and employers; would assist in promoting better health of the nation; stimulate a desirable immigration and cut down the toll from Canadian families in emigration to other countries.

Taxation which would provide funds for the system might well be divided between the federal, provincial and municipal governments on population basis with industries paying the greater share. This might amount to something less than 2 per cent. of their present payroll, said Father Lebel. Father Lebel said that it might be well to introduce the scheme into the civil service, partially to bring the details of the working of the system before the public.

Makes Saving Compulsory

Clock Keeps Accurate Time As Long As Money Is Deposited Each Day

A novel idea to promote saving has been introduced in Darmstadt, in Germany. The municipal savings bank there has distributed to its clients clocks which will only go when regularly fed with shillings or their equivalent. The stopping of the clock is a reminder to continue saving, or, in other words, the clock says, "No pay, no work." There is a similar clock in an hotel in Rhydding, Wales. The clock, which is of good appearance and suitable for any living room, keeps accurate time, so long as it is regularly paid for each day and night shift.

Will Have Wider Scope

Slot machines, until now confined mainly to the sale of cigarettes and chocolates, are to be given a much wider scope by a Sheffield company, which plans to manufacture 88 different types of machines. Each will sell a different commodity, ranging from tins of sardines to razor blades.

George Bernard Shaw says the time is coming when no coal will be used. Maybe he means next summer.

FLU Germs Breed In the Throat.

First Appear As A Common Cold, But Gain Tremendous Headway In Six Hours

SOME SIMPLE PRECAUTIONS AGAINST INFLUENZA

Simple precautions taken now will enable you to fight dreaded "Flu" which is sweeping rapidly through the whole country. The germs of Influenza gain access to the body through the mouth and throat. Keep the throat healthy and you go a long way towards stopping the trouble. An effective means of prevention is to gargle the throat three or four times daily with Nerviline. Half a teaspoonful of Nerviline in water makes a most efficient gargle. The germ-killing properties of Nerviline quickly destroy any bacteria in the mouth or throat. If the chest is sore, if the throat is hoarse, if you have a cough—be sure to rub the neck and chest with Nerviline. Every drop of it will rub in, and out will come the congestion.

Of course it is absolutely necessary to house-clean the system with Dr. Hamilton's Pills which stimulate the eliminating organs, and rid the system of disease-breeding germs. This combination treatment of Nerviline and Dr. Hamilton's Pills will give prompt and entirely satisfactory results.

Was Remarkable Linguist

Gifted Belgian Had One Specialty Which Can Never Be Surpassed

Newspaper readers who have followed the reports of international conferences since the war may remember the numerous references and tributes made and paid to the official interpreter, Gustav Henri Camerlynck, recently reported to have succumbed to influenza in Paris. Born in Flanders, this remarkable linguist appears to have had a fairy godmother, who endowed him with the gift of tongues. Educated at Lille and in Paris, he became a teacher of English in the high school of St. Louis, University of Paris, occasionally varying his regular task by giving lectures in German at the Sorbonne. But he found his real metier after the world war when his wonderful translating skill led to his being drafted for service as interpreter for the momentous peace deliberations at Versailles. There he proved his possession of one specialty never paralleled by any other man of whom record remains.

By means of a shorthand of his own devising he would take accurate notes of what was being said, but he did not overlook those delicate shadings of manner and intonation which are the true life of an oration. Consciously or unconsciously, M. Camerlynk was able to throw himself into the character of the man whose address he was repeating. Thus at Washington, when he was translating Briand, he managed to put into his English the orotund quality of declamation so characteristic of the French statesman. When he was translating Balfour he gave to his French that unemotional and lucid clarity of expression which was Balfour to the life. When he was translating Hughes his enunciation took upon itself qualities so distinctly Hughesian that anybody could recognize them. If at a given place in an address the original speaker's voice had soared, had become dramatic, or had dropped to tense undertones, M. Camerlynck's voice invariably did the same when he reached that particular point in the translation.

The one job on which this gifted Belgian must prided himself he did so well that the world may count itself lucky if it ever finds his equal. That it will ever find his superior is incredible.

Another Trap For Bandits

Scotland Yard is considering the adoption of novel trap for bandits in motor cars. The device consists of a mat of steel tentacles and wire chains, placed across the road. When the bandit car crosses the mat the wires and chains grip the chassis and entangle it in such a manner that a fast-moving car is stopped in less than 100 yards.

Black peppermint was first grown commercially about 65 years ago and has now almost entirely superseded the white.

League Of Nations In Canada

Dr. H. M. Tory Is President Of Society With Membership Of Over Sixteen Thousand

With enthusiastic supporters on either side of the House of Commons and of the Senate, and with an active executive representative of practically every denomination and organization throughout the country interested in the maintenance of world peace, the League of Nations Society, of, Canada, is entering upon the eighth year of its existence. Its function is to awaken and sustain an interest in the activities of the League, and towards this end it has already accomplished a great deal. Presided over first by Sir Robert Borden, later by Sir George Foster, and now by Doctor H. M. Tory, it has been ably led, and the powerful and beneficial influence it has grown to exert appears likely to continue.

Doctor Tory, the newly elected president, is known throughout Canada as President of the National Research Council. Born in Nova Scotia, and for many years President of Alberta University, he is intimately associated with the east and the west; and as a student of international affairs and a member of the Society since its inception in 1920, he is keenly interested in and closely in touch with the activities of the League of Nations.

The Society of which he is now president numbers upwards of sixteen thousand members, and has branches established everywhere in Canada. Following the membership drive of the Society, on April 16th, "League of Nations Day," it will probably be considerably increased, and friends of Doctor Tory, and supporters of the League movement in this country, will join in wishing him every success in the discharge of his new duties.

Recipes For This Week

(By Betty Barclay)

ECONOMY PUDDING SAUCE

1 tablespoon cornstarch.
Few gratings lemon rind.
½ cup sugar.
1 cup boiling water.
2 tablespoons butter.
2 tablespoons lemon juice.
Few gratings nutmeg.
Few grains salt.

Mix cornstarch, lemon rind and sugar; add water, gradually, stirring constantly, and boil five minutes. Remove from fire; add lemon juice, butter and seasonings.

BOW-MAN'S BAKED HAM

1 thick slice of ham.
2 apples.
½ cup nectars raisins.
¼ cup brown sugar.
¼ cup water.

Place ham in baking dish, cover with raisins, then with apples, cut in slices. Sprinkle sugar on top, add water, cover and bake in moderate oven 45 minutes or until ham is tender.

Corns are painful growths. Holloway's Corn Remover will remove them.

Making Movies Educative

Bulgarian Ministry Of Education Supports Well Equipped Picture Department

Bulgarian Minister of Public Instruction, has presented a new bill to Parliament providing for the encouragement for all moving picture houses. The Ministry of Education has a moving picture department, supplied with automobiles, films and other necessary equipment, as well as lecturers. Picture units work among the remoter towns and villages, giving shows in the open village squares. But they are altogether insufficient, and the Government wants to expand the movement.

A good seat in a good movie theatre in Sofia costs 10 cents. In the school movie shows a child may get a good seat for two cents and an adult for three. School children are not permitted to go to any movie at night.

Canada Leading Customer

Exports of Ayrshires from Great Britain last year totalled 176. Canada was, as formerly, the leading customer, taking in all 93 head. Exports to other countries were: Kenya Colony, 31; South America, 14; Denmark, 13; South Africa, 12; United States, 11, and Ceylon, 3.

Aluminum street cars, lighter and quieter than the heavy steel cars now in general use, are being tried in several cities in the United States.

To the small boy who has to wear his father's made-over apparel, life seems one dreary ex-pants!

SUN LIFE ASSURANCE COMPANY OF CANADA

A TOWER OF STRENGTH

1928

Assurances in force (net) An Increase of $408,925,000	$1,896,915,000
New Assurances Paid for An Increase of $112,836,000	441,244,000
Total Income An Increase of $41,972,000	144,747,000
Surplus earned during the Year	40,264,000
Payments to Policyholders and Beneficiaries	49,920,000
Surplus and Contingency Reserve An Increase of $9,157,000	66,938,000
Total Liabilities (Including Paid up Capital)	422,020,000
Assets, at December 31st, 1928 An Increase of $87,652,000	488,958,000
Rate of Interest earned on mean invested assets (net)	6.58%

DIVIDENDS TO POLICYHOLDERS INCREASED FOR NINTH SUCCESSIVE YEAR

The Company has also inaugurated the practice of paying a special maturity dividend on participating policies, ten or more years in force, terminating by death or maturity.

EXTRACTS FROM DIRECTORS' REPORT

. . . After deducting amounts re-assured, the total assurances in force now amount to $1,896,915,934.57, an increase of $408,925,154.48. Policies in force number 433,240, and in addition 293 certificates of assurance are held by employees of corporations and firms under the group plan.

While every field of operation contributed its full share to these impressive advances, the rapid development of our business in Great Britain and the United States is especially noteworthy. The generous reception of our Company in countries served by powerful domestic institutions is particularly gratifying, as testifying to widespread appreciation of our record and services.

. . . The amount paid to policyholders since organization, together with the amount at present held for their security or benefit, exceeds the total amount received from them in premiums by $111,370,229.10.

The strength and resources of the Company have been still further enhanced.

The net rate of interest earned on the mean invested assets, after making provision for investment expenses, has risen to 6.58 per cent. Dividend increases, bonuses and stock privileges, accruing on many of the Company's holdings, contributed substantially to this gratifying result.

A net profit of $11,028,854.39 has been realized from the redemption or sale of securities which had risen to high premiums.

The securities listed in the assets have been valued at figures substantially below the valued placed on them by the Government. This under-valuation of our securities represents an important safeguard against possible adverse market fluctuations, additional to the reserves specifically provided against that contingency.

We are again able to report that on the bonds and preferred stocks listed in the assets, not one dollar, due either as interest or as dividend, is in arrear for a single day; while the dividends accruing to common stocks exceed by several million dollars those payable on the same stocks at the time of purchase.

The surplus earned during the year, based on the values given in the accounts, amounted to $40,264,088.52.

$10,000,000. has been deducted from the already heavily marked-down value of securities, as additional provision against possible fluctuations, increasing the amount so set aside to $20,000,000.

The special amount set aside as a liability to provide for unforeseen contingencies has been maintained at $12,500,000.

$15,822,339.65 has been paid or allotted as profits to policyholders during the year.

After making all deductions and allocations, $9,157,966.34 has been added to the undivided surplus, bringing the total over liabilities, contingency accounts, and capital stock, to $54,438,862.48.

The continued prosperity of the Company enables your Directors to announce, for the ninth successive year, a substantial increase in the scale of profits to be distributed to participating policyholders during the ensuing year.

In addition, your Directors have inaugurated the principle of granting a Special Dividend on participating policies maturing after having been in force ten years or longer. This new bonus will enable policyholders or beneficiaries whose withdrawal is occasioned by the maturity of policy contracts, to participate in the accumulated surplus which it has not as yet been considered prudent to divide.

The effort to provide life assurance at the lowest net cost obtainable has been increasingly appreciated. Our policyholders will be gratified by this further evidence of our desire that the Company's prosperity shall be fully shared by its members.

SUN LIFE ASSURANCE COMPANY OF CANADA

Three Hazardous Jobs

Railroad Worker, Steel Worker, and Miner Are Great Chances

The three most hazardous jobs in America are those of the steel worker, the railroad yard worker, and the miner, reports the Bureau of Labor Statistics. Other hazardous occupations are glass blowing, slaughtering, and meat packing, and work in lumber planing mills.

During the last year the number of accidents were reduced in almost every industry. However, one worker in 16 suffered injury, losing an average time of 71 days. For every fatal accident there were 955 minor ones. The total time lost during the year due to accidents was more than 19,265 years.

Mrs. Sam Speers Tells How Cuticura Healed Her Baby

"When baby was three days old he started to break out with eczema. It began with very small pimples which later festered and broke and then scaled over. When he was twelve days old he was almost entirely covered with eruptions. The affected parts seemed to itch and burn so that I had to keep mittens on his hands to prevent him scratching his face.

"My mother advised me to try Cuticura Soap and Ointment. He seemed to get relief after the first treatment, and in two months he was completely healed." (Signed) Mrs. Sam Speers, Innisfree, Alberta.

Cuticura Soap, a world-famous aid to beauty, cleanses and purifies the skin and hair, restoring them to their natural, fresh and wholesome beauty. Its daily use maintains them in a delightfully healthy condition.

Soap 25c. Ointment 25 and 50c. Talcum 25c. Sold everywhere. Sample each free. Address: Cuticura Dept. 21 K 'Will Semper Limited Montreal. Cuticura Shaving Stick 25c.

Little Helps For This Week

"Truth shall be they shied and buckler."—Psalm xci. 4.

Get but the truth once uttered, and it is like
A star new-born that drops into its place,
And which, once circling in its placid round,
Not all the tumult of the earth can shake.
—James Russell Lowell.

Delight no less in truth than life.
—Shakespeare.

Goldsmith: For my part I'd tell the truth and shame the devil.

Johnson: Yes, sir; but the devil will be angry. I wish to shame the devil as much as you do, but I should choose to be out of the reach of his claws.

Goldsmith: His claws can do you no harm when you have the shield of truth.—Boswell's Life of Johnson.

Roads In Canada

A total of 6,020 miles of road was constructed during 1927, and 44,416 miles were maintained under provincial patrol or gang maintenance systems.

There is coal in almost all of the islands of the north and much of that area is favorable to mineralization, in the opinion of George F. Mackenzie, former gold commissioner in the Yukon.

Hurricanes which blow at a rate of 80 miles per hour exert a pressure of 32 pounds per square foot.

Success is not made by lying awake at night, but by keeping awake in the daytime.

Minard's Liniment for Coughs and Colds.

To Boost Edmonton

New Industrial Association Has Been Organized To Encourage Industries

A new association has been formed in Edmonton under the name of the Edmonton Industrial Association, of which J. B. Starky, of the Penn Mine, is president, and W. R. Howson, local barrister, vice-president. The association gave a get-together dinner recently, which was attended by 150 business men. The object of the organization is to patronize Edmonton-made goods and to encourage industries in the city.

"Marlatt's Treatment"

INTESTINAL flu, high blood pressure, nervous disorders—how careful one must be to avoid these dangerous ailments at this time of the year.

Keep the system clear of poisons and impurities. Tone up the liver, prevent bile stagnation, and intestinal lethargy. Let Marlatt's help you as it helps thousands every year to ward off illness and disease.

The tomato crop at the Dominion Greenhouse is making good progress and is expected to be ready for market in a few weeks. There is now a fine crop of lettuce. The greenhouse will have a good assortment of flowers and vegetables for setting out.

School will reopen after the Easter holidays, on Monday, April 8th.

* * *

Raymond.—According to a cable from London, England, discoveries likely to be important for the Canadian beet sugar industry have been made at Oxford. A means has been found to dry the sugar beet and thus allow the manufacture of sugar to be continued throughout the year, and it is even believed that a method of treating the resulting effluent in such a way as to free it from poison has also come to light. The discoveries are a result of four years' research work.

Vancouver.—I am satisfied with the progress of Canadian products in the Chinese trade field and prospects for the increase of trade are extremely good," Col. Moore Cosgrave, Canadian Government Trade Commissioner to China, said here on his arrival from the Orient. "Canadian products of all kinds and especially those from British Columbia are being very well received in China now. There is no real boycott against Canadian goods; the Chinese merchant knows his prices and knows where to place his orders."

Announcement has been made from Canadian Pacific Railway headquarters that a "Remembrance Tour" is being organized for the coming summer for ex-soldiers, their relations and friends to visit the scenes of battles in France and Flanders during the Great War. The tour will leave Montreal July 12 next, on board Canadian Pacific liner "Duchess of Bedford", one of the new cabin class steamships which will be placed by the company on the St. Lawrence route this year.

Dog Licenses

All Dog Licenses are now due and unless same are paid by April 15th 1929, the Town Bylaw regarding delinquents will e enforced.

All the way from Camrose, Alta., to Glasgow, Scotland, unaccompanied, a distance of approximately 5,000 miles is the record of Donald James Campbell, nine years of age. He took the All-Red route of the C.P.R. across the Dominion to Saint John, where he embarked on the liner Montclare bound for Glasgow. He is visiting his aunt, who lives in Busby, Glasgow.

All previous records in connection with the westbound movement of grain to Vancouver over Canadian Pacific Railway lines were broken during the first two weeks in January, according to E. Cotterell, superintendent of transportation, western lines of the company. Deliveries at Vancouver by the Canadian Pacific during the fortnight in question totalled approximately 22,500,000 bushels of grain.

Calgary.—Farm land values in Southern Alberta are tending to become firm as the result of the series of good crops, and more inquiries for farm acreage have been received in the last few months, according to real estate men, than in any similar period in the past five or six years. Farms offered for sale last spring at $15 per acre and bringing no offers are selling now for from $20 to $25 per acre. The demand for farms both for purchase and rental is decidedly strong.

In recognition of the fine work by officers of the Canadian Pacific Railway and the Canadian National during the last summer tour of the second triennial Empire Mining and Metallurgical Congress, presentations of gold and enamel cuff links were made recently, to fifteen employees of both companies, at a dinner held in Montreal. E. W. Beatty, president of the C.P.R. and Sir Henry Thornton of the C.N.R., were both present.

Snowshoe week in Quebec got away to a good start when several thousand members of the Roquette Clubs paraded the streets of the old city and later some 1,300 snowshoers in full winter festival costume made an attack on the walls defended by the garrison and illuminated by a brilliant fireworks display. The chief center of interest there is the International Dog Derby, which is to be staged shortly and for this visitors from the entire Dominion and the United States are flocking to Quebec, taking the Chateau Frontenac to its full capacity. The Port of Montreal has again scored a new record with grain deliveries at 210,500,000 bushels for the season of navigation. Last year's deliveries ran to 195,247,314 bushels and those of 1926 to 134,591,240 bushels.

Many visitors from western cities in Canada and the United States are expected at the Banff Winter Carnival this season, said W. A. Brewster, president of the winter sports organization at Banff, judging from the number of inquiries that have been received. Skiing, skating, and other kindred winter sports will be in full swing, he said, and it now appears there will be many competitors from outside points in the various events.
